

**WORLD SUPER YACHT**  
2004/2005

# Equipped for every eventuality

The painting shed can accommodate up to two vessels at any given time

Marina Barcelona 92 (MB'92) is probably the best equipped of all the shipyards in the Mediterranean devoted to repairing, refitting and maintaining super yachts. Facilities include a 35,000m<sup>2</sup> hard standing area, served by a 2000-tonne Syncrolift and a 150-tonne Travelift; a 2000-tonne Syncrolift build with vessel transfer system, which enables six to eight yachts to be repaired simultaneously, depending on their size (up to 80m); a covered painting shed, which can accommodate two floating

vessels of up to 75m in length at any one time; a 150-tonne Travelift, able to haul yachts of up to 35m in length; an outfitting quay (360m of mooring for repair works); a 2500m<sup>2</sup> covered storage area; a 40-tonne hydraulic trailer (Yard Boss); a high number of cranes and forklifts; and 11,000m<sup>2</sup> of workshop and office space.

With its superior facilities and dynamic human resources team, MB'92 is able to deliver customer service of the highest

quality. The majority of the yard's clients are super yachts of 30–100m in length, mostly sailing under foreign flags.

MB'92 has a comprehensive technical, commercial, administrative and works management structure in place, and provides all the services related to the maintenance, repair and conversion of super yachts, including engineering, mechanical work, steel work, rigging, electronics, fittings, paintwork, joinery, salvage and safety, cooling, composite boatbuilding, design, and interior decoration. It also places considerable emphasis on compliance with classification societies and the Marine Coastguard Agency (MCA). The number of staff in the area totals around 350 people.

With all this equipment and expertise at its disposal, MB'92 typically services around 60 yachts of 30–100m in length and around 300 vessels of 10–30m in length every year.
