

Marina Barcelona 92 introduces a new, more dynamic, website with additional contents

Marina Barcelona 92, a megayachts refit, repair and maintenance shipyard, launches its new website. This new site enhances its dynamism and has an attractive design that includes the colours of its new, overhauled, corporate image.

The new website benefits from a greatly improved design, both from a practical and aesthetic point of view, and also enhances its navigation, with quick access to the pages from the same menu bar.

The main aim is to simplify the access to the information on the available facilities and services. This goal dovetails with a news portal where MB'92 shall relay all the news related to the shipyard's activities.
